

Safety

Hazard & Risk Assessment

Every company in Kenya is under a legal duty to arrange for a "competent person" to assess all health and safety risks in their workplace. We can provide for a qualified health and safety consultant to carry out a full hazard and risk assessment review on your behalf, including fire risk assessment, general risk assessment, and health and safety training assessments.

Other Safety Services include:

1. Ergonomics
2. Occupation health & Safety Audits
3. Hazard Communication
4. Air quality
5. Sound pollution
6. Bloodborne Pathogens
7. Laboratory and general workplace Safety
8. Policy development
9. Waste and wastewater management
10. Emergency Action Plans
11. Personal Protective Equipment
12. Fire safety

"Be Safe And SAVE"

Environmental Impact Assessment/Audit Services

Our consultants are NEMA Lead Experts on Environmental Impact and Audit Assessment (EIA/EA). **Please contact us for EIA/EA requirements.**

" Provision of Complete Environmental Health and Safety Solutions"

Quality Management Systems

Health & Safety Auditing

Auditing is a valuable management tool that is highly recommended in Kenya. We have fully trained **ISO 9001:2000, ISO 14000, and OHSAS 18001 Lead Auditors** who can undertake full quality or health and safety audits on your organization so you know how you measure up to standards required by the Kenya Bureau of Standards (KEBS).

Frequently we are asked, **"What are the benefits?"**

Well, beyond simple compliance, we have found that the benefits of having a well-developed and managed worker health and safety program include:

- ◆ Better relations between employees and management
- ◆ Fewer lost workdays due to injury or illness
- ◆ Increased employee productivity
- ◆ Enhancement of the company's public image

EHS Consultancy Ltd. provides comprehensive occupational health and safety services to safeguard the health and safety of workers in all types of facilities.

Compliance on Good Practices (GxP)

Depending on the facility GxP can refer to Good manufacturing practice (GMP), Good engineering practice (GEP), Good laboratory practice (GLP), Good safety practice (GSP), Good clinical practice (GCP), Good Management Practice (GMP), Good Distribution Practice (GDP), Good Research Practice (GRP) and Good Recruitment Practice (GRP).

ENVIRONMENTAL HEALTH SAFETY (EHSCONSULTANCY) LIMITED

Company Motto:

" Provision of Complete Environmental Health and Safety Solutions"

Company Vision Statement:

EHS Consultancy Ltd is committed to being the leading environmental, health and safety consulting company.

Company Mission Statement:

EHS Consultancy Ltd is available for businesses and government to take command of obligations and requirements for meeting a full spectrum of hazardous material, waste, occupational, environmental, health and safety regulations.

OUR SERVICES

About Us

Environmental Health Safety (EHS Consultancy) Ltd, is an environmental, health, workplace safety, and quality management consulting firm with its offices in Nairobi, Kenya. The company is made up of a consortium of experts who have been providing technical and leadership support in environmental performance within the country and the neighbouring countries for well into a decade.

We provide environmental, health, and workplace safety services that promote the health and well-being of our clients' staffs, reduce operating risks, and lower compliance costs.

New regulations in Kenya and elsewhere in the world has placed an increasing burden on companies to manage the way in which their activities impact people and the environment, as well as, the way companies do business.

EHS Consultancy Ltd believes that these regulatory requirements will increase as public awareness of the environmental, health and safety issues continue to expand and the corresponding promulgation of statutes and regulations grow exponentially in the future.

Health & Safety Policy

It is a legal requirement under Factories and Other Places or Work Act (Cap 514) for organizations with five or more employees to have a health and safety policy. This formalizes the organizational arrangements for health and safety management. It identifies not only who is responsible, but also gives rules on health and safety procedures for all the relevant legal and business issues. Evidence of a valid health and safety policy is normally required by your clients or insurance providers. **Contact us now for developing your health and safety policy.**

Training Services

We can provide you with individually tailored health and safety training courses that address your specific needs either in-house, or at our safety training venue delivered by health and safety consultants. We are registered Trainers on Health, Safety and Environment in Kenya.

We train issues towards developing the following programs:

1. Biosafety and Biosecurity
2. Occupational Health
3. Bloodborne pathogens
4. Chemical Hygiene Plans (CHP)
5. Fire safety and use of fire equipment
6. Hazard Communication
7. Radiation safety
8. Spill prevention
9. Waste Management
10. Monitoring and evaluation
11. Regulations and Compliance
12. Vertebrate and invertebrate animal safety

Key Benefits

- ◆ Training helps employees protect themselves and their co-workers
- ◆ Training reduces liability
- ◆ Training increases staff morale
- ◆ Training increases staff productivity
- ◆ Training can enhance the public image of your company

Waste Management Services

Managing your hazardous wastes responsibly requires an efficient and effective network of on and off site services and facilities. As a critical link in your waste management network, the transportation service you select can further reduce your environmental liabilities. You can be confident of the highest level of environmental security when you select EHS Consultancy Ltd to manage your transportation and waste needs.

Our hazardous waste transportation & disposal van

EHS Consultancy Ltd provides consultancy services to waste generators, transporters, processors and disposers.

Hazardous waste bins and bags

We can assist you to design appropriate waste bins for your operations.

We also provide Hazardous waste bags (red, yellow) non hazardous bags (green, white, brown and blue).

Call us on 254(020) 2054451/2/3 for these services
